

The In Control Advanced Driver Training Mobile Unit

Now Training
in N Andover,
Worcester &
Cape Cod

In Control offers the unique ability to bring our training to you, your employees and your clients with our Mobile Training Unit. The unit allows us to run our complete programs and features:

A 900 square foot “wedding style” canopy.
Fully enclosable and heated.

Audio/visual presentation capabilities

- Capacity for 5 training vehicles, and all other necessary training materials
- Self contained generator for electrical needs.
- A motorhome portion with restroom, refrigerator, AC and running water.

The only thing we can't carry with us is the pavement. In order to use our mobile unit and train safely we need a suitable site, generally any unobstructed piece of pavement measuring 1200' (approximately ¼ mile) by 150' works. Unobstructed means devoid of light poles, curbs and other potential hazards. We will work to find the nearest suitable site for any customer and are happy to follow up on any potential sites which can be identified.

List of previously used or accessible sites available upon request.
